

Why VISO TRUST?

VISO TRUST is an AI-powered third-party cyber due diligence platform that delivers the information your company needs to make critical risk decisions at the speed of business.

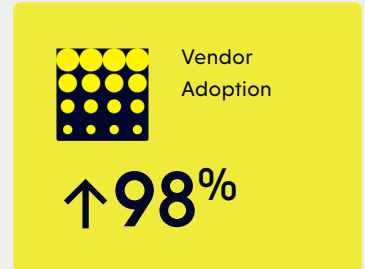

VISO TRUST empowers your security team effortlessly access risk intelligence for unlimited third-party vendors.

Unlike any other traditional solutions, VISO TRUST completely automates due diligence end to end and uses curated artificial intelligence to save everyone time and resources.

How it Works

The platform leverages a collection of industry-leading **proprietary artificial intelligence services called VISO Oracle**, including our core offering: Artifact Intelligence, which discovers, classifies, and assesses relevant control information in source artifacts that third parties already possess.

VISO TRUST's modern approach eliminates the need for manual assessments, simplifying engagement with vendors to a matter of minutes. This approach delivers high fidelity and actionable intelligence, which is not possible with prior methods such as risk ratings or security questionnaires.

FEATURES

Artifact Intelligence

By using curated AI to extract relevant insights from artefacts, Document Intelligence determines the security posture of vendors automatically, without any user interaction.

Turnkey Due Diligence

Turnkey Due Diligence simplifies an otherwise complex process and allows companies to effortlessly assess third parties.

Risk Insights

Gain a comprehensive overview of your organization's cyber risk posture and make data-driven decisions to reduce risk across third-party relationships.

Artifact Intelligence Delivers Accurate Risk Intelligence

- Leveraging source documents and audit reports delivers accurate results
- An expert team curates assessments using AI and document heuristics
- Risk assessments are delivered at the speed of business

We were spending more than 8 hours in security staff time for each vendor relationship, and when you are short on time, you miss risks. VISO TRUST has enabled us to catch all the risks quickly and to bring that down to 30 minutes per relationship. I'd say that's gold.

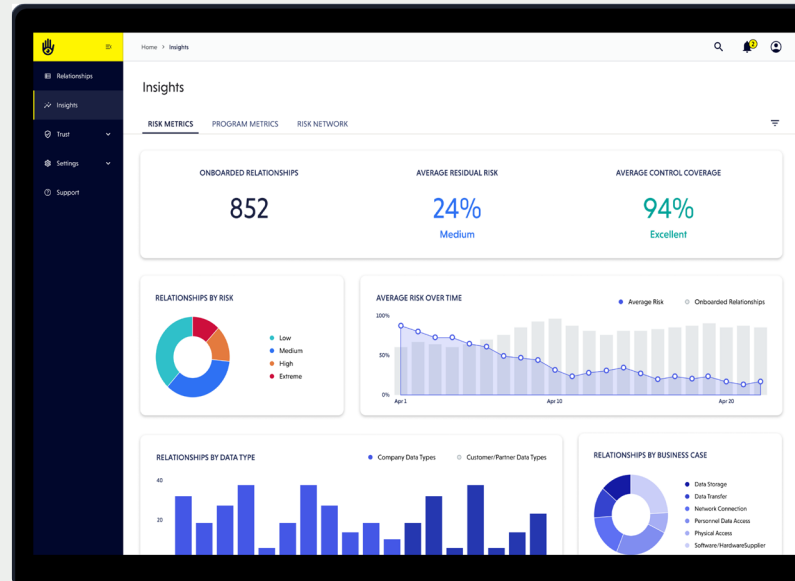

James Nelson
Chief Information Security Officer

Turnkey Due Diligence Engages Third Parties

- Effortlessly interact with thousands of third parties
- Third parties can fulfill assessment requests in minutes
- Continually engaging third parties keeps data fresh

Risk Insights Empowers Visibility & Action at Scale

- Quickly identify previously unknown 4th party relationships with Risk Network Intelligence
- Complete visibility into your risk posture and operations with in-depth dashboards
- Data-driven actions to support your security and risk program
